Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

1. Claim 5 and 6 recite the limitation the slide strap. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 7-11, 13 rejected under 35 U.S.C. 103(a) as being unpatentable over Miller.

Miller discloses the use of a pounder with a grip disposed about a shaft which extends between a strap and a bumper end (see figure 1) and a resilient polyurethane non-slip bumper (paragraph 16) bumper end.

Miller does not disclose the specific of a key or the dimensions as recited by the applicant.

However, It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device as disclosed by Miller to include the specific dimensions as claimed by the applicant since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

With regards to the applicant's recitation of the key, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed

Art Unit: 2837

does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Miller in view of Bergman et al.

Miller discloses the use of a pounder with a grip disposed about a shaft which extends between a strap and a bumper end and a resilient non-slip bumper (paragraph 16) bumper end.

Miller does not disclose the use of a slide strap (see figure 13).

However it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device as disclosed by Miller to include the slide Strap as disclosed by Bergman in order to provide a securing means for a hand held device.

5. Claims 3-6, 12, and 14-18 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 19 and 20 are allowed.
